

Get a hepatitis C test!*

You can participate in this study if you:

- Are over 18
- Have injected drugs in the last 6 months

*You don't have to take part in this study to get a hepatitis C test.

#1 Have a test

Get tested for Hep C – all it takes is a finger-prick!

#2 Complete surveys

Answer questions about your demographics and drug history

#3 Get your results

Your results will be available in about a week. The nurse will give you your result.

#4 Talk about treatments

If you are positive, discuss your result with the nurse and talk about starting treatment and continuing on the study!

You will be reimbursed \$30 for enrolling in the study.
If you are positive and continue on the study, there are further reimbursements for study visits.

Join the study here: *[insert location, days, times, and contact details of clinic]*

Your participation in this study is confidential.

This study has been approved by the St Vincent's Hospital Sydney Human Research Ethics Committee (Project Identifier 2019/ETH13041)
